DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 19-27, drawn to a multi-pack, as well as the process of making such, containing bags that may be removed individually in sequence, classified in Class 206, Subclasses 554 and 526.
- II. Claim 28, drawn to a method of transdermal administration of hormones, classified in Class 424, Subclass 449.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and method of making (Group I) and process of using (Group II). The inventions are distinct in the instant case, because the product and method of making do not result in the particular product to be used in the method of using of Group II. Note that Group II requires the presence of a medicament, and more particular, hormones in a distinct relationship.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
